PKS-703 Cradle	327-0350-001A

Details of Notice:

We first introduced the parallel memory key family 30 years ago. Back in February of 2012, we announced the End Of Life on our last remaining parallel memory key, the PK64. With no active parallel keys in our product line, the time has come to obsolete the remaining items in the parallel key family. Long-term availability is one of the important values that the Datakey brand is known for, and we think the parallel key has demonstrated our commitment to this core value.

This product notice is being published as the official End-of-Life (EOL) announcement for our parallel key receptacles, reader/writers and accessories. See complete list of products above.

We are offering a Last-Time-Buy (LTB) opportunity for our customers on these products. All orders must be placed by December 31, 2014 with deliveries taken by March 31, 2015.

Previously Obsolete:	Part Number:
PK64KC Parallel Key	612-0026-000A

We have a limited number of the PK64KC keys remaining in stock and available for purchase.

Please contact the Datakey Customer Care Team with any questions you may have on this EOL notice.

Important Dates:

Last-Time-Buy Deadline:	December 31, 2014
Delivery Completion on LTB:	March 31, 2015
