Details of Notice:

Based on customer feedback, ATEK Access Technologies has redesigned its clear plastic tray used to ship Datakey receptacles. The new tray offers several improvements making it easier to pick and place Datakey SlimLine board-mount receptacles directly from the tray. Previously, Datakey SlimLine panel-mount receptacles also shipped in these trays. Going forward, all panel-mount SlimLine token receptacles will ship in a corrugated box with an insert that is capable of holding up to 25 receptacles. Please note that it is <u>not</u> a requirement to order in multiples of 25.
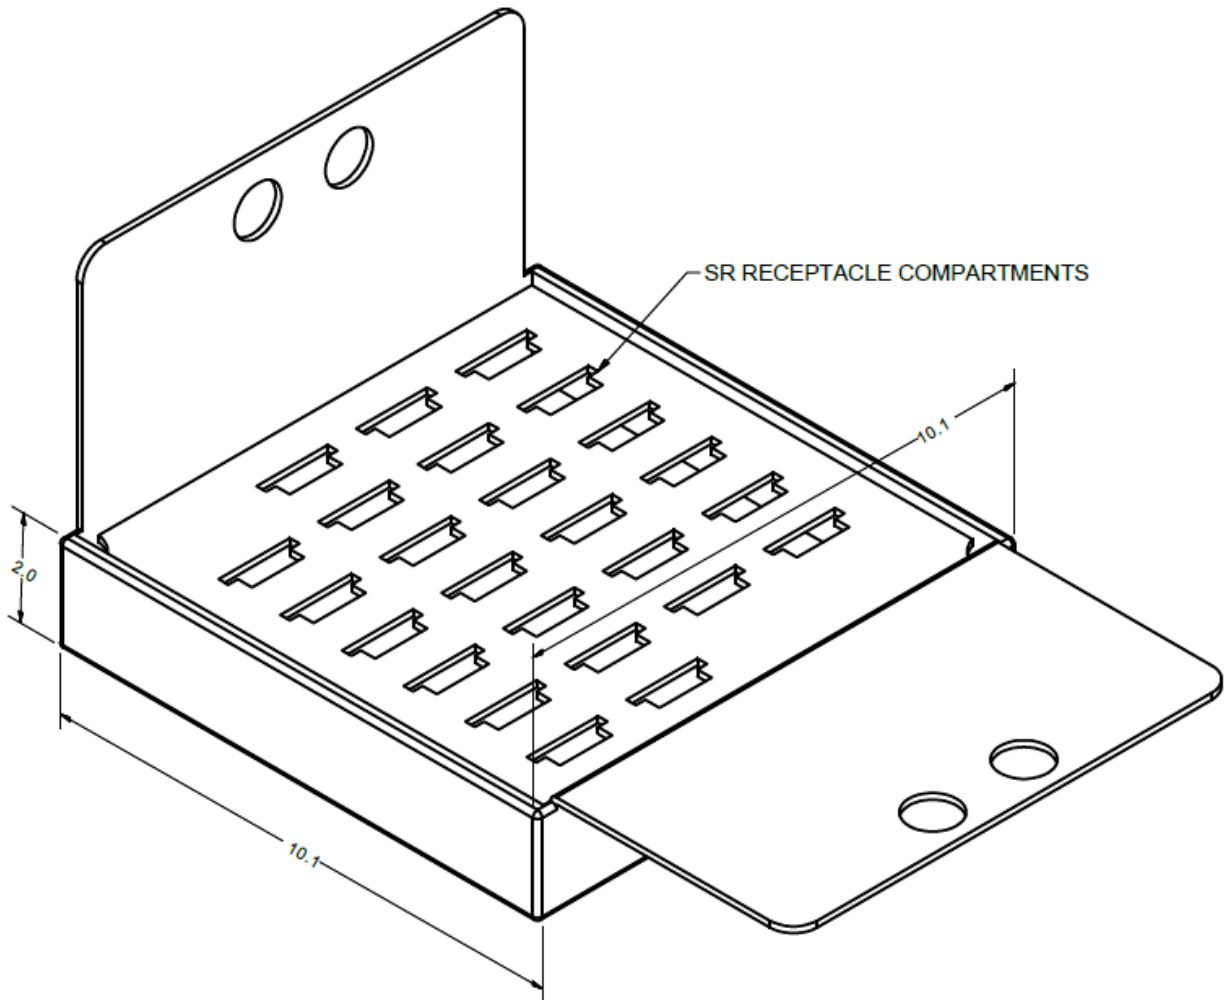

The new packaging is more robust than the previous plastic trays and should ensure safe transport of Datakey panel-mount receptacles. All receptacles listed above are now shipping using the new packaging.

For reference, dimensioned drawings of the old plastic trays and the new corrugated boxes are shown below.

Old Tray (12.8" x 5.3" x 1.1"):
