

Datakey – Product Change Notification

PCN Number: 20230425
Notice Date: 25 April 2023
Notification Subject: Product Change Notification (PCN)

Summary Description:

As part of ATEK Access Technologies' commitment to investing in our manufacturing capabilities, we recently replaced one of our injection molding machines. This horizontal press is used to mold many of the housing components that are used in Datakey receptacles. This machine is also used to make many of the plastic components in our Plug memory token products. While the machine itself is brand new, the same tooling that has been used in the past will continue to be used with the new machine. Likewise, there will be no changes to the materials used to mold these products. In fact, there are no changes to the form, fit, or function of any of the products made on this machine. This PCN is simply a notification that a new machine is being used to make the parts listed on this PCN.

Affected Products:

SlimLine Receptacles, Panel-Mount
SlimLine Receptacles, Board-Mount
Key Receptacles, Panel-Mount
Key Receptacle, Board-Mount
Plug Memory Tokens

Part Numbers:

See listing below.

Details of Notice:

Prior to the arrival of the new injection molding machine, a surplus of parts was molded and placed into inventory. This inventory will give the ATEK manufacturing team ample time to go through the qualification process for this new equipment. The ATEK manufacturing team is following the IQ/OQ/PQ validation process. Additionally, all parts molded on this new machine will go through a PPAP (Production Part Approval Process) prior to "new" parts being placed into inventory.

If you have any questions regarding this PCN, please contact the Datakey Customer Care Team.
